Thanking You,

Yours sincerely,

Sahibzada Ajit Singh Nagar

Course Outline and Purpose:

The course shall include a basic introduction to:

- Introduction to Clay Modelling Fundamentals
- Method and Materials (Earthen Clay)
- Techniques
- Face Structure and Body Structure
- Relief Work and Three-dimensional Work

Sr. No.	Date	Activity	Duration- One week (Hours)
1.	02-10-2021	About Clay Modelling	5 hrs.
2.	04-10-2021	Method and Materials	5 hrs.
3.	05-10-2021	Techniques	5 hrs.
4.	06-10-2021	Face Structure and Body Structure	5 hrs.
5.	07-10-2021	Relief Work and Three-dimensional Work	5 hrs.
6.	08-10-2021	Presentation and Showcasing	5 hrs.

Purpose:

The sculpting in clay modeling helps translate an artist's vision into tangible reality. When the students work with clay, they learn about the volume and structure of different objects and shapes. The use of different tools for blending, sculpting, thinning, texturing, poking, scraping, and cutting allows them to understand the tactility of the material, and they are introduced to new materials. The trial-and-error method helps develop the students thinking and motor skills. Additionally, working with clay allows students to explore their creativity and experiment with different techniques. They can learn how to manipulate the clay to create various textures and forms, fostering their artistic expression. Moreover, the hands-on experience of sculpting in clay helps students develop a deeper understanding of spatial relationships and proportions, enhancing their ability to visually represent objects in three dimensions.
